

Certified ratio ALG / upper bound vs. $1/e$ — $G(n=20, p=0.3)$, 10 graph seeds, mean ± 1 sd

Random greedy (mean)

- Random greedy / Dual bound
- Random greedy / Top-k degrees
- Random greedy / Total edge weight
- Random greedy / OPT (true)
- 1/e guarantee

Plain greedy

- Plain greedy / Dual bound
- Plain greedy / Top-k degrees
- Plain greedy / Total edge weight
- Plain greedy / OPT (true)
- 1/e guarantee
